

Gewerbeschule Breisach

The Gewerbeschule Breisach is a vocational school. You can find it in the town of Breisach. Breisach is a small town in the very south west of Germany, in the federal country of Baden-Württemberg. The well-known university town Freiburg is only 30 km east of Breisach.

The 10.000 inhabitant town of Breisach is situated on the river Rhine. The Rhine is the boarder with France. In Breisach there is a highly frequented bridge across the river Rhine to France. According to the regulations of the EU there is no customs check between Germany. So you can just cross the bridge without showing your passport.

For more information about Breisach please click onto the website of Breisach which is www.breisach.de

The mainstream of our school´s work is done within the field of the “Dual System” of vocational education.

“The basic idea behind this system is for young people to be trained by vocational schools and company in unison, in order to reinforce the tight interlocking of theory and practice, thus training well qualified specialists. In this way there are two educational entres. The public vocational school and the company or firm training centre. Thus it can be described as a dual system.”

(Text taken from a brochure of the Baden-Württemberg Ministry of Education and Sports)

At Breisach vocational school technology all around the vehicle is the main teaching subject. This is done in several different sectors at our school.

1. Master craftsmen

Master craftsmen of different specialisation can get their education at our school. The exams are taken by the chamber of handicrafts in Freiburg. Our school offers courses to get your master craftsman certificate in these fields:

- heavy-goods vehicles and passenger vehicles
- two-wheeled vehicles e.g. bicycles, scooters and motorbikes
- agricultural machinery
- construction site equipment

2. Dual vocational school

In all these sectors we also teach apprentices during their time of apprenticeship (first year up to the third year). This type of school is called Berufsschule. (= vocational school within the “Dual System of Education”)

3. Full time vocational school

At our school there are also students attending the “Berufsfachschule” (= vocational school in full time).

This is a full time establishment in contrast to Berufsschule which means that all lessons, practical sessions as well as theory, take place at school.

(Text taken from a brochure of the Baden-Württemberg Ministry of Education and Sports)

At Breisach vocational school you can attend the two-year course of the Berufsfachschule (= vocational school in full time) in the subjects of metal works or electricity.

At present there are 40 teachers and 1400 students at our school. Modern workshops and garages are well equipped for teaching the necessary theory and vocational practice. There is equipment for modern teaching in all the sectors of our school. We are very proud of being sponsored by companies and manufactures of vehicles and machinery. This enables our teachers to use the latest technology in their lessons. This way we can ensure the most up-to-date knowledge for our students.

Our students come from the area of Breisach and from the south of the the federal country of Baden-Württemberg. Some students even come from more distant federal countries. There are even some young men and women from all over the Federal Republic of Germany here at our school. For those

students who cannot commute the school offers a hostel.
Our school has school partnerships with a French vocational school, the

Lycée Professionnel “Paul-Emile-Victor” in Obernai

and a vocational school from Bale in Switzerland, the

“Lehrwerkstätte für Mechanik der Gewerbeschule Basel”.
